## WPS15

### **WPS 15**

### WEBER

#### **GENERATING SET MODEL WPS 15**

| Output Ratings            | Prime  | Standby  |
|---------------------------|--------|----------|
| 400 V,3 ph,50 Hz,1500 rpm | 15 kVA | 16.5 kVA |
|                           | 12 kW  | 13.2kW   |

Power Factor: 0.8

#### **ENGINE / TECHNICAL DATA**

| Engine Make                        | Perkins             |
|------------------------------------|---------------------|
| Engine Model                       | 403A-15G2           |
| Governing Type                     | Mechanical          |
| Number of Cylinders                | 3                   |
| Cylinder Arrangement               | Vertical In Line    |
| Bore and Stroke mm                 | 84 x 90             |
| Displacement / Cubic Capacity Itrs | 1.496               |
| Induction System                   | Naturally Aspirated |
| Cycle                              | 4 stroke            |
| Combustion System                  | Indirect Injection  |
| Compression Ratio                  | 22.5:1              |
| Rotation                           | Anti-clockwise      |
| Cooling System                     | Water Cooled        |

#### STANDARD SPECIFICATIONS

Perkins four stroke heavy duty high performance industrial type diesel engine

#### 2. ENGINE FILTRATION SYSTEM

- Cartridge type dry airfilterTwo cartridge type fuelfilters
- Full flow lube oilfilter

All filters have replacable elements

#### 3. COOLINGRADIATOR

Radiator and cooling fan, complete with safety guards, designed to cool the engine at high ambient temperatures(consult your dealer for deration factors)

#### 4 FXHAUSTSYSTEM

Heavy duty Industrial Exhaust Silencer

Silencer noisereductionlevel 20 (dB) 10.2(kPa) Maximum allowablebackpressure

#### 5. CIRCUIT BREAKERTYPE

ABB 3 pole MCCB.(4 pole is optional)

#### 6. FUELSYSTEM

On Generating sets upto 700kVA, the baseframe design is incorporated with an integral fuel tank with a capacity of approx. 8 hours running at full load. The tank is supplied complete with fill cap breather, fuel speed and return lines to the engine and drain plug.

#### 7. ALTERNATOR

#### 7.1 INSULATIONSYSTEM

• Insulation : ClassH

- All windings are impregnated in either a triple dip thermosetting liquid, oil and a cidres is ting polyester varnishor vaccum pressure impregnated with a special polyester resin.
- Heavycoatofantitrackingvarnishadditionalprotection against moisture or condenasation.

#### 7.2 AUTOMATIC VOLTAGE REGULATOR(AVR)

The fully sealed AVR maintains the voltage regulation at  $\pm 0.5\%$ . Nominal adjustment by means of a trim pot incorporated on the AVR.

#### 7.3 MOTORSTARTING

Anoverload capacity equivalent to 300% of the full load impedanceatzeropowerfactorcanbesustainedfor 10 sec., when AREP or PMG option is fitted.

#### 8. MOUNTINGARRANGEMENT

#### 81 BASEFRAME

The complete generating set is mounted as a whole on a heavy duty fabricated steel baseframe.

#### 8.2 COUPLING

The engine and alternator are directly coupled by means of an SAE flange. The engine flywheel is flexibly coupled to the alternator rotor.

#### 8.3 ANTI-VIBRATION MOUNTING PADS

Anti-vibration pads are affixed between the engine / alternator feet and the baseframe thus ensuring complete vibration isolation of the rotating assembly.

#### Powered by:

### **ENGINE / TECHNICAL DATA (continued)**

| Frequency and Engine Speed             | 50Hz & 1500rpm |         |  |
|--|----------------|---------|--|
|  | Prime          | Standby |  |
| Gross Engine Power kW(hp)              | 14(18)         | 15(20)  |  |
| Fuel Consumption @50%load L/hr         | 2.3            | -       |  |
| @75%load L/hr                          | 3.2            |         |  |

#### STANDARD SPECIFICATIONS

#### 8.4 SAFETYGUARDS

The fan and fan drive along with the battery charging alternator are safety guard protected for personnel protection.

#### 9. FACTORYTESTS

- The generating set is load tested beforedispatch.
- All protective devices control functions and site load conditions are simulated. The generator and it's systems are checked beforedispatch.

#### 10. EQUIPMENTFINISHING

All mild steel components are fully degreased and painted with powder coated paint to ensure maximum scuff resistance and durability.

#### 11. DOCUMENTATIONS

Operation and Maintenance manual, circuit wiring diagrams and commissioning/fault finding instruction leaflets are accompanied with the generator.

#### CONTROL PANEL

Deep Sea DSE4510

The DSE4510 is an Auto Start Control Module for single genset applications. It includes a backlit LCD display which clearly shows the status of the engine all the times. This module can either be programmed using the front panel or by using the DSE configuration suitr PCsoftware.

#### Metering and AlarmIndications:
